DETAILED ACTION

1. The terminal disclaimer filed on May 10, 2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 6,228,893 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Reasons for Allowance

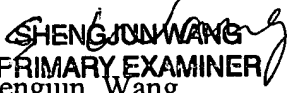

2. The amendments and remarks filed January 24, 2006 have been entered and considered. The amendments and remarks are persuasive to put the application in conditions for allowance. Particularly, the amendments limit the claimed invention to the employment of trimethyl cyclohexenoic long chain fatty alcohols with a C15-C28 linear chain for treating ALS. Even though the prior art suggest that cyclohexenoic long chain fatty alcohols are useful for neuroprotection, it is unpredictable as to the structure-activity relationship. Particularly, Girlanda-Junges discloses that the activity of cyclohexenoic long chain fatty alcohol with mono or di methyl substituents disappears when the chain length increased C15 (page 7740). Instant application shows trimethyl cyclohexenoic long chain fatty alcohol with chain length at 15 actually has better activity compared to those with shorter chain length (table 1 at page 28, the specification), and fairly suggests that trimethyl substituent is critical for cyclohexenoic long chain fatty alcohol with chain length of C15 or more. Furthermore applicants' statements regarding Luu reference (USPN 6,228,893) disqualify the reference as valid prior art.
